Axia® 2.0 office chairs

People are different. Doing different things and with unique ways of living AND working. That requires a unique office chair. A sophisticated seating system that combines all our expertise in ergonomics, biomechanics, design and sustainability. And that's about healthy working and smart seating.

Correct support of the back and the arms is essential for preventing static muscle loads while working sitting down. The patented movement mechanism in the BMA Axia chairs supports and relaxes the back, neck and arms in any position, while your feet maintain contact with the floor. The daily reality has long proven that Axia chairs are very successful and are essential in combating absence through illness.

Award Winning

The Axia 2.0 has won various top international prizes, providing independent validation of the quality, design, appearance and ergonomic comfort of these chairs.

Axia® 2.1

- ✓ Effective support of the lower back.
- ✓ Modular construction so it can be adapted to the height and weight of the user.
- ✓ Especially suitable for smaller people.
- ✓ Can be optionally fitted with a lightweight mechanism (for users <45 kg) and a lowered gas spring.

reddot award 2014
best of the best

Axia® 2.2

- ✓ Fitted with a high back rest.
- ✓ The most popular model.
- ✓ Extremely well suited to the New Way of Working.
- ✓ Suitable for at least 95% of office staff.
- ✓ Office chair with the highest independent score for quality, ergonomics and user friendliness.

Axia® 2.3

- ✓ Extremely comfortable thanks to the extra thick, ergonomically formed back padding.
- ✓ Fitted as standard with thicker seat cushion.
- ✓ Plenty of sitting comfort, even for heavier users.

Axia® 2.4

- ✓ The extra high back gives this chair status and allure.
- ✓ The perfect office chair for tall people.
- ✓ Can be optionally fitted with a mechanism with 4 cm extra seat depth for supporting long thighs.
- ✓ Can also be fitted with an adjustable head rest.

Axia® 2.5

- ✓ Equipped with a netweave back with pelvic support.
- ✓ it looks luxurious and special thanks to its design, quality and functionality.
- ✓ The favourite of architects everywhere.
- ✓ Equipped with a transparant netweave fabric.
- ✓ The netweave fabric is adjustable in different colours.

Axia® 2.5

- ✓ Also available in a beige netweave fabric with 34% wool for a warm, natural appearance.
- ✓ Cool in summer, warm in winter.

Axia® support

Good posture of the pelvis will prevent a curved back (and thus static muscle load). It's therefore essential that the seat back and the seat move synchronously so that the lower back is well supported. BMA Ergonomics has applied this synchro principle in an improved form. Axia chairs are characterised by bracing: the back rest and seat move together at a fixed angle, ensuring proper pelvic support thanks to the interaction between the support points in the back rest and seat.

Axia® seat

Thanks to the unique seat, the Axia naturally moves together with the user as they lean forward or backward. Since the front part of the seat is fixed, only the rear section of the chair moves together with the user. The result: optimal and comfortable support when seated passively, but with the proper activation of back and stomach muscles when sitting actively. Because the front of the chair does not rise when sitting dynamically, your sitting height remains at a responsible level, your feet retain contact with the floor and no extra pressure is exerted on your thighs.

Axia® armrests

Preventing neck and shoulder problems. One unique feature of the armrests is the adjustable pads and the fact that they do not move when the chair is tilted. This ensures optimal support to the lower arms in any position and means they do not get pinched between the armrests and the desktop.

Axia® adjustment

The operation of Axia office chairs is simple, practical and intuitive. The Axia can be infinitely adjusted in many different ways. All controls are located wherever they are expected. For functions that need to be changed during work, one can find the controls both left and right. Settings that the user often only needs once are centrally controlled.

The Axia has a weight setting. This allows the chair to be quickly and effortlessly adjusted with exactly the right counter-pressure so that the chair flawlessly follows the user when sitting actively.

Axia[®] visitors chairs

- ✓ Specially developed for meeting rooms, presentation rooms and for use as an extra chair at the workstation.
- ✓ During long meetings and important discussions and presentations, it is important that you are able to sit in a relaxed manner.
- ✓ The Axia Visit visitor chairs guarantee optimal and comfortable support, so sitting for long periods still means you can sit comfortably in an ergonomically responsible way.
- ✓ Available in the same fabrics as the Axia 2.0 range.

Axia® 2.0 Smart Active office chairs

Every user is unique. And there is a unique Axia Smart Active office chair that fits. That is why the accompanying 'Axia Smart Active App' provides tailor-made advice about improving your work style. You only need to install the free app on your smartphone and link it with the signal from your chair.

By setting your own seating profile, you receive personal feedback from the Axia Smart Active App on your sitting behavior. Clear sitting statistics stimulate you to get the best out of your working day. The app also gives you fun and practical advice for a more active work style. Until you are a "5-star sitter" and have developed healthy sitting habits.

Axia® Smart Active

Axia[®] Smart Active

- ✓ Optional extra on any Axia 2.0 chair.
- ✓ The Axia Smart Active technology provides direct feedback on your sitting habits via a vibrating signal in the seat.
- ✓ Teaches the user healthy, active working habits.
- ✓ The related free App provides personal advice and shows clear statistics to make users more aware of their sitting habits.
- ✓ This office chair suits an active personnel policy that puts employee health first.

Axia[®] bespoke

An Axia 2.0 chair without any modifications is an excellent choice for 95% of West-European officer workers. But for the rest, Axia bespoke chairs are the perfect solution for healthy and comfortable sitting. Targeted modifications to the chair ensure that every user can sit well on an Axia bespoke office chair.

And for workers with medical problems too, Axia bespoke also provides the ideal solution. Does a member of staff have an extra concave back or joint problems? Or have they recently had a hernia? Then the right support is more important than ever. But pelvic instability, varicose veins or sensitive coccyx also benefit from targeted modifications. So your employee goes home at the end of the day feeling fit and relaxed.

Work Healthy – Sit Smart

At BMA Ergonomics, we combine our knowledge and expertise in the field of ergonomics and biomechanics with technology and sustainability. We study the constantly changing workplace and understand the wishes and requirements of the individual office worker and users of 24/7 chairs. An Axia with Smart Active Technology makes users more aware of their posture and provides active support. It is our mission to improve the posture of office workers and to ensure that everyone learns to adopt a healthier way of working.

Inspire great work

Flokk is the market leader in the design, development and production of workplace furniture in Europe. We are the proud owner of product brands HÅG, RH, Giroflex, BMA, Offecct, RBM, Profim and Malmstolen. About 2.500 employees work together to realize the vision of our company: Inspire great work.

Our head office is in Oslo, Norway. We have production units in Røros (Norway); in Zwolle (the Netherlands); in Koblenz (Switzerland), in Turek (Poland) and in Tibro, Nässjö and Hunnebostrand (Sweden). In addition, we keep sales offices in Norway, Sweden, Denmark, Germany, Belgium, the Netherlands, UK, France, Switzerland, Singapore, USA, China and Australia. Flokk products are sold in more than 50 countries.
