About us

MOEBE is a Danish design studio that creates furniture, lighting, and interiors. Formed in 2014 by architects Martin de Neergaard Christensen, Nicholas Oldroyd and cabinetmaker Anders Thams.

We design everything in-house and bring our designs from idea to the final product. Our products are based on seperable elements and can be assembled, repaired and recycled with ease. We strive to reduce our designs to their most simple forms.

Anders Thams, Martin de Neergaard Christensen and Nicholas Oldroyd

Being a small creative team, we are involved in all processes - from sketches to choice of supplier and final product.

Our approach to design is analogue, and we want to keep our designs simple and easy to understand. We believe that good design in itself can be sustainable, that is why we design and produce products that are long lasting and which stays relevant for more than a few years.

All MOEBE designs are characterized by functionality and simple parts. We love to play with the construction and many of our designs are made up of just a few elements. We are intrigued by developing new details and bringing different materials together.

How we work

**At MOEBE we care about good design.
We care about what we make
and care about how we make it.**

Sustainability has to be more than just skin deep.
For us great design is not just about creating a
beautiful shape in the colour of the moment.

We just don't believe in single use products,
furniture that only suits a trend, or quality that
doesn't last.

A great product has to be designed to last, to be
repaired and easily recycled if and when that time
(hopefully never) comes. It must be made using
quality materials, produced in an honest way and
never with a negative impact on people or our
global environment.

We are passionate about design and interiors -
and love seeing our ideas come to life. However,
not all of our ideas make it. Often a design that
we otherwise believe is fantastic can't be made
in a good way or shipped efficiently. When this is
the case, we simply won't make it.

For that reason, we don't have a huge collection.
We present a few new designs yearly - that's it.

Repair and replace

We create products so that they can be repaired. Should a part break, then only the piece that is broken needs to be replaced rather than the product as a whole.

Recycle

We design products and furniture that last, that can be repaired, and that can be easily stripped to its individual parts and recycled.

Responsible shipping

Our products all consist of separate parts, ensuring that it can be shipped entirely flat-packed or in a reduced form, thereby, cutting down transport volume to an absolute minimum.

Responsible packaging

We treat the design of our packaging as important as our products. Our packaging is cardboard based, with no lamination. It protects our products through the rigors of shipping, and once its job is complete, it can easily be recycled.

Responsible production

We only produce our products with partners that we trust and whose production is socially and environmentally responsible.

95% of our production is European based and 100% of our production conforms to our stringent CSR Policy.

Shelving System

Shelving System gives you full freedom to build your own piece of furniture. Build as tall and as wide as you like. Build around corners, or even span different levels. It can serve as a room divider or simply be placed against a wall.

Shelving System is built entirely from individual parts. Enabling you to create a customised system that perfectly matches your needs.

Pivot. Expand. Go wider. Go higher.

News - Adding more flexibility

Flexibility at its core

Two new shelf sizes make the Shelving System even more versatile than previously and provide more options for configuring a shelving solution which is easy to adapt to all spaces and ever changing needs. You can expand, rebuild or transform the shelving system to fit almost anything you need. Should your needs change, the system can change.

Shelving System, set S.200.2.D

New – Shelf 162 x 35

More space - more freedom. The 162 x 35 shelf is spanning across two bays and adding more freedom and flexibility to the interior. Whether placed under a TV or used for the growing vinyl selection, the 162 x 35 shelf is the perfect choice. It is beautiful both as a standalone piece and in combination with the other shelving elements.

Shelving System, set S.200.2.B

New – Shelf 85 x 17,5

The new shelf 85 x 17,5 is a narrow shelf with half the depth as a standard shelf. It is ideal for the smaller items on display. Make room for all your cups, plates and other kitchen essentials by adding the half shelves to the kitchen setting or use it for storing your pens, pencils and notebooks in the home office. Shelf 85 x 17,5 also fits the new Wall Shelving.

Shelving System, set S.200.1.E

**Shelves at any height**

The shelves are held in place by wedges, and there are, therefore, no predefined positions. You can place a shelf at any height and add as many shelves as you like.

Navigate different heights

Be it up a set of stairs or simply navigating an uneven floor. Each leg can be adjusted in height independently, allowing you to easily deal with tricky uneven surfaces.

Rotate to any angle

Add a new bay at any angle, simply pivot around a shared leg or join together to continue in the same direction.

Build as tall as you like

We offer three leg sizes: 65 cm, 85 cm and 115 cm. All legs can be attached together in any combination by joining them with "Leg connector sets". The only limitation is the height of your space.

Build as wide as you like

Simply keep adding leg sets and shelves in whichever direction you want to go. One bay measures 85 cm. Because of the overlap each additional bay will add 78 cm to the length.

Transform the Shelving System into a small home office by adding the Desk. The desk simply replaces one of the shelves, and can be placed at any given height.

Shelving System, set S.255.2.E

With Cabinet you have the possibility to hide away those things that you don't want on show - we all have them. The Cabinet can be placed at any height within the system, and still allows for shelves to be placed at either side.

You can easily turn your Shelving System into a wardrobe - simply by adding the Clothes Bar. It easily grips onto the edge of the shelf. Add and remove as needed. Perfect for the bedroom or hallway.

New – Wall Shelving

Build. Expand. Go higher. Go wider. Designed for every wall in your home.

With the same flexibility as all our designs, the new Wall Shelving lets you build as tall and wide as you like. Create a simple look, using only one set. Or go a little crazy and build an entire wall of shelves. You decide.

Use it hanging on the wall, or standing on the floor going all the way from floor to ceiling. Our Wall Shelving is always securely attached to the wall, making it suitable for your kid's room, living room, kitchen; well, any room, really.

Add sticks made from powder coated steel in black or white. With a depth of 17.5 cm, the shelves are spacious enough to store your favourite items while only taking up little space.

Wall Shelving, WS.115.1

Storage Box

Storage Box is a beautiful storage box ideal for the living room, the bedroom or the kids room. It is minimalist and simple - cut down to its core function: hide away those things you often use, but don't want to be lying around.

The Storage Box appears minimalist yet spacious. It is made from a few separate parts and you can assemble and disassemble it again. Use the frames as handles to effortlessly move the boxes around or stack it to optimize space.

Storage Box, Oak/Black

Storage Box, Oak/White

Storage Box, Oak/Black

New – Organise

Life is complex and full of things. Pencils, keys, glasses, magazines, chargers and all these things that need their own place... Organise does what it says: It gives them that place - it organises.

Each Organise is made of solid untreated oak and is held together by a single rubber band. Available in A4 and A5. Each size is stackable and compatible with the other. Works alone or combined together.

Frame

Frame consists of two pieces of acrylic glass, four lists made of either untreated oak or aluminum, and a rubber band. The rubber band both holds the frame together and serves for hanging the frame on your wall. By keeping the construction to the outer edge, the glass is held free and fully transparent. This allows the motif to hover against the underlying background, giving new possibilities to how and what can be framed.

New – Frame Ash

Frame is now also available in ash. Exactly as you know it, but in beautiful ash which adds a delicate and natural light touch to the frame collection.

It comes untreated like our Oak frames, and with a light grey rubber band to support the delicate tones of the frame.

Floating Leaves

Made in collaboration with the Copenhagen-based design companies; Paper Collective and Norm Architects, the series of transparent botanic photography is specially created for our frame. Floating Leaves gives the illusion of a real leaf, so nature can easily be invited inside.

Ceramic Pendant

Ceramic Pendant is a simple pendant lamp that allows you to illuminate directly or to an angle. Its shade, whilst circular at the base, is rectangular at the top and sits freely to the cord. This allows the shade to angle left, right and rotate completely around. The pendant can be used as a single piece by the side of a bed or sofa or used in combination over a dining table.

The pendant has been left unglazed, raw and been burnt at over 1100°C, creating a final surface that is matt and fine-textured. The shade is handmade and therefore, every lamp slightly varies in shape, size, and colour, making each pendant unique.

Ceramic Pendant comes in White, Terracotta, Olive and Light Grey. While the white ceramic pendant is translucent, the coloured lamps are not. Both versions give a beautiful soft light.

Ceramic Pendant, Wide, Olive

Ceramic Pendant, Wide, Light Grey

Ceramic Pendant, Narrow, White

Ceramic Pendant, Narrow, Terracotta

Ceramic Table Lamp

Ceramic Table Lamp is a sculptural lamp that can illuminate in all directions. Its lampshade is completely adjustable and can be pivoted up, down and rotated around concentrating the light in any one direction. Place on a desk, window, side table or shelf and use as a backlight or a direct one.

The ceramic has been left unglazed, raw and been burnt at over 1100°C, creating a final surface that is matte and fine-textured. Each piece is handmade and therefore, every lamp slightly varies in shape, size, and colour, making each table lamp unique.

Wall Mirror

Our Wall Mirrors are frameless mirrors only held by a lightweight wire form. The mirrors are kept simple, letting the materials speak for themselves. The construction of the wire only lightly touching the glass is what makes the design simple and elegant. The mirrors have a soft and simple expression, which fits well in both minimalistic and classic settings.

Tall Wall Mirror, Brass

Wall Mirror, Ø30, Black

Wall Mirror, Ø50, Brass

Tall Wall Mirror, Chrome

Standing Mirror

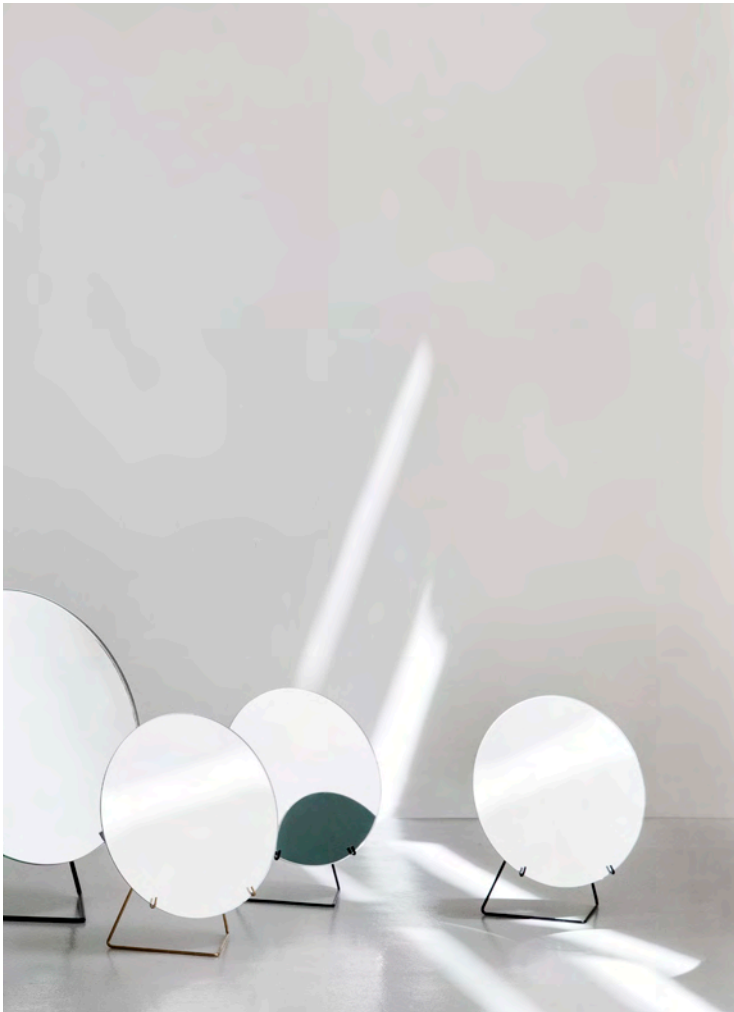

Standing Mirror is a frame-less free-standing mirror held by a lightweight wire form. The contrasting properties of the two components – solid and permeable, light and heavy – are what give the design its character.

Standing Mirror, Ø20, Black and Brass

Standing Mirror, Ø20, Black

Cutting Board

The Cutting Board is designed to be used in the everyday kitchen while the minimalist design also invites to be used directly on the dining table. The cutting board is elegant with a simple expression - as simple as a piece of wood.

The tapering V-shaped edges of Cutting Board serve ideally as handles whilst also creating a narrow edge for the board to stand and dry when cleaned, keeping the edges in better condition, longer.

The Cutting Board is made of sustainably grown and certified solid European oak and is available in two sizes: small and large. The small one is perfect for a loaf of bread while the bigger one is a perfect serving tray ideal for tapas, cheese and other small dishes.

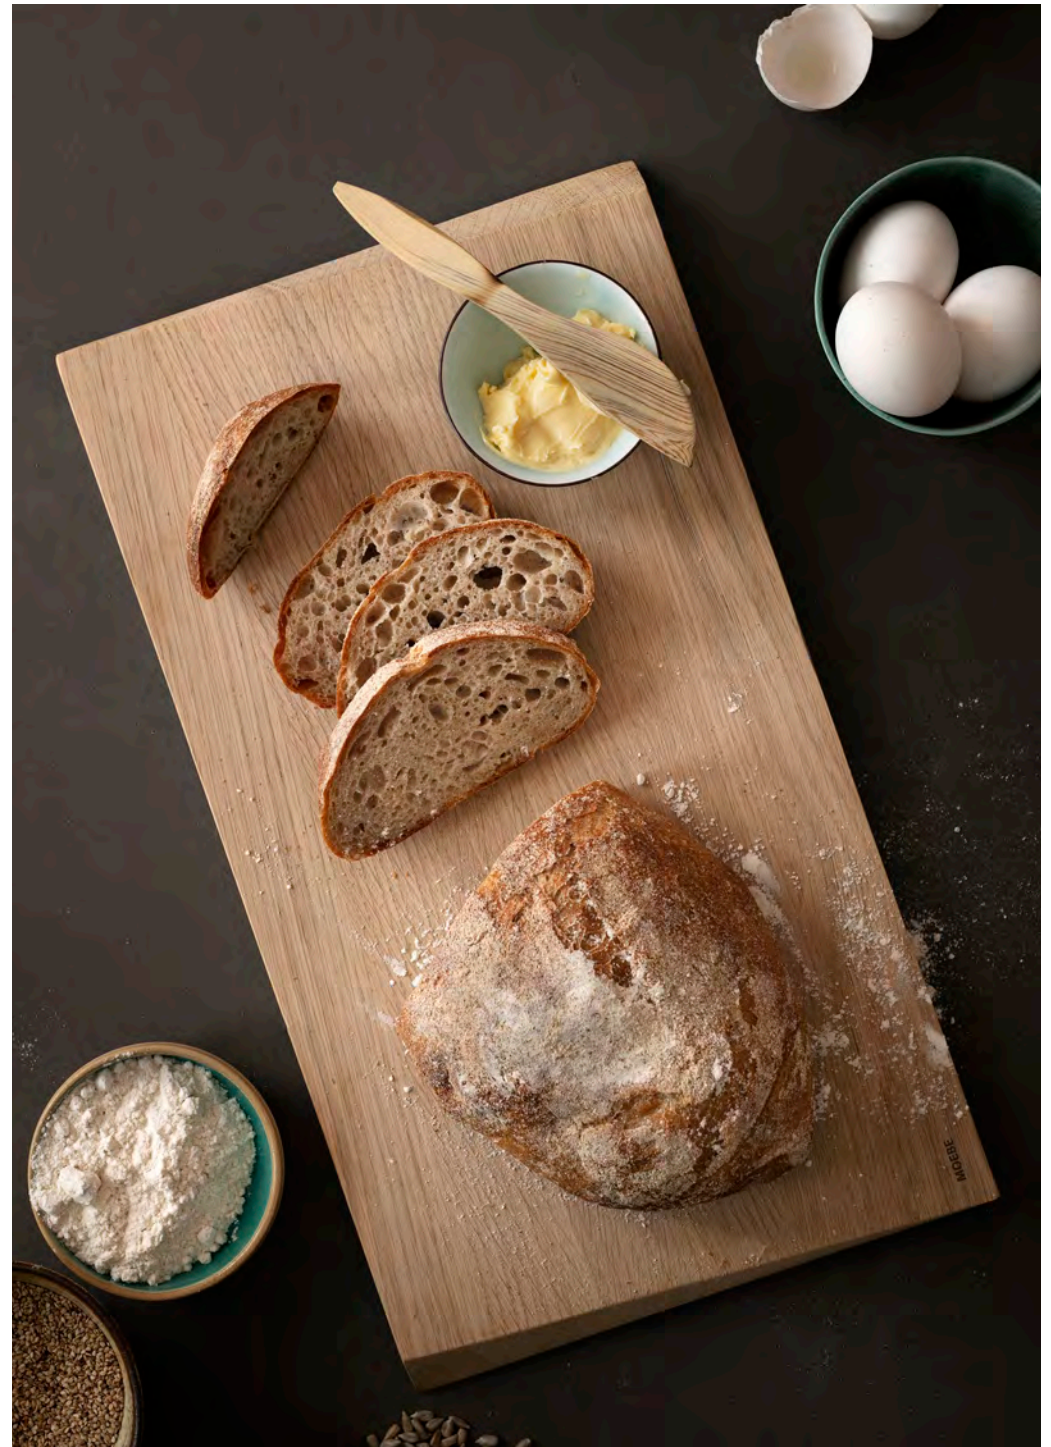

Cutting Board, Large

Cutting Board, Small and Large

Wall Hook

Wall Hook is formed as one single continuous element. The hook has two points for hanging your coat, keys, cap etc. Either over the top of the bent wire or underneath on the actual hook. To keep the form of the wall hook as simple as possible, we turned the hook point inwards. This way achieving a closed and harmonious form.

The hook is as simple to mount as it is to look at. With no extra pieces or additions needed, simply screw the hook into the wall until the round shoulder meets the finished surface.

Wall Hook, Small and Large, Black

Wall Hook, Large, Matt gold

Coat Rack

Coat Rack is a simple rack. Drawing just a fine line on your wall, the rack ensures a clean look for your hallway, kitchen or bathroom. The rack consists of a metal rod and 4-6 pegs. The pegs simply slide on the rod and can, therefore, be moved around as needed. As the rod can easily be removed from the wall, pegs can be added or removed in an instant.

Coat Rack, 40 cm, Chrome

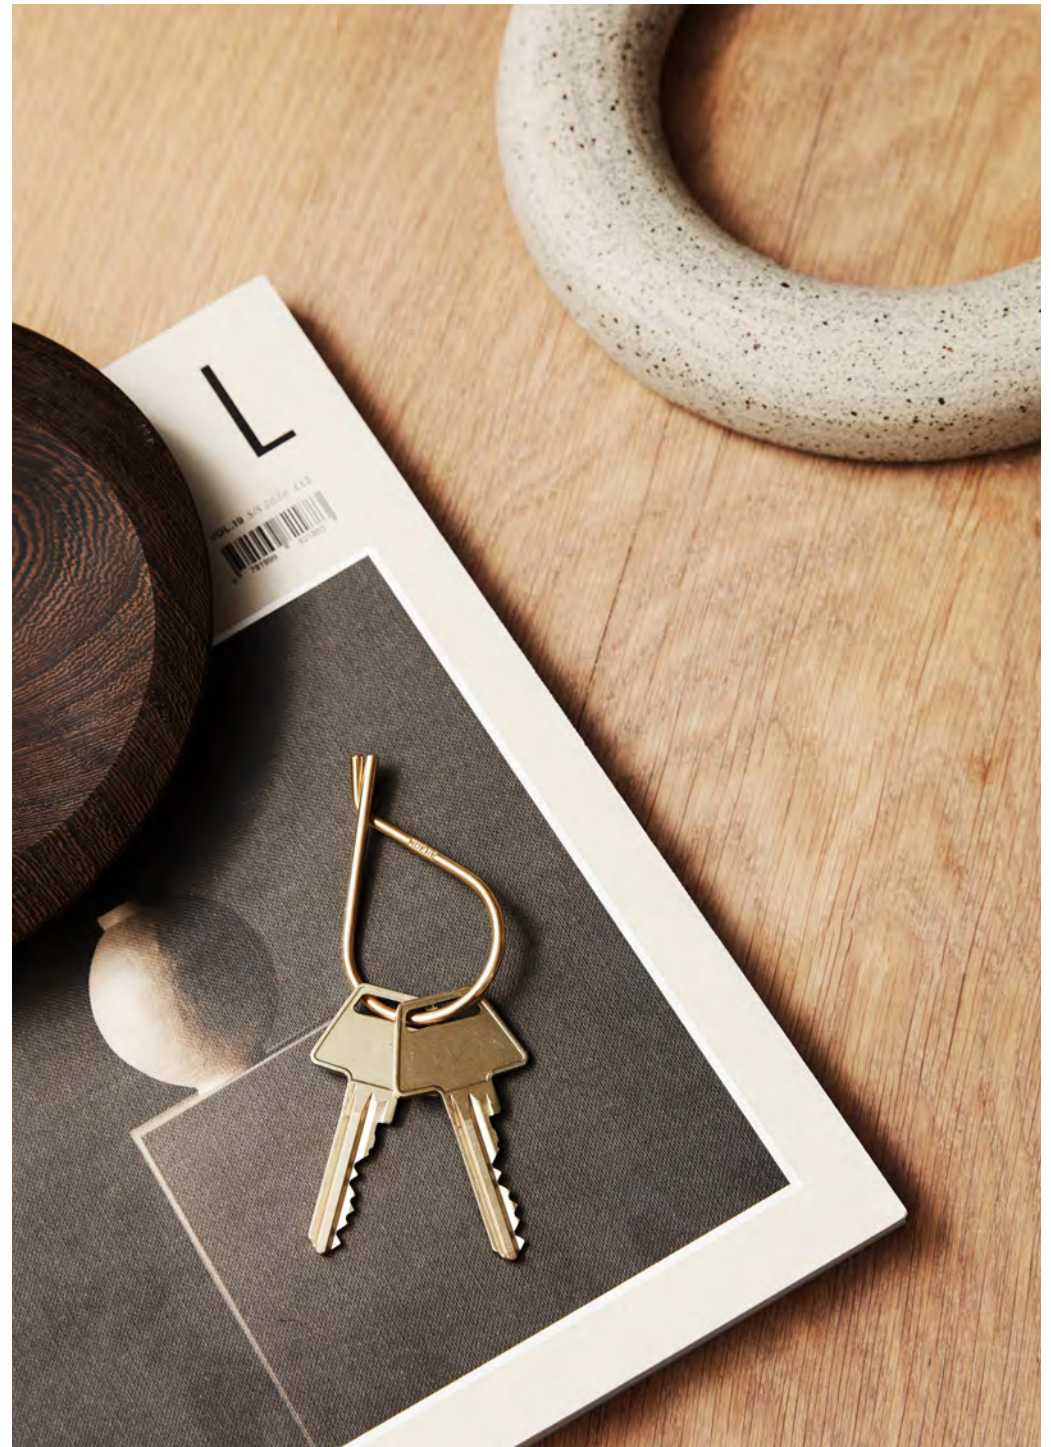

Coat Rack, 70 cm, Black

New – Key Ring

Key Ring is made of a single piece of brass wire with only two bends - it can hardly be more simple. Key Ring is made to keep your keys in place in a stylish and minimalist way.

The drop shaped Key Ring is locked by a clever, yet simple closing mechanism securing your keys will stay organised and kept safe.

Polygrif

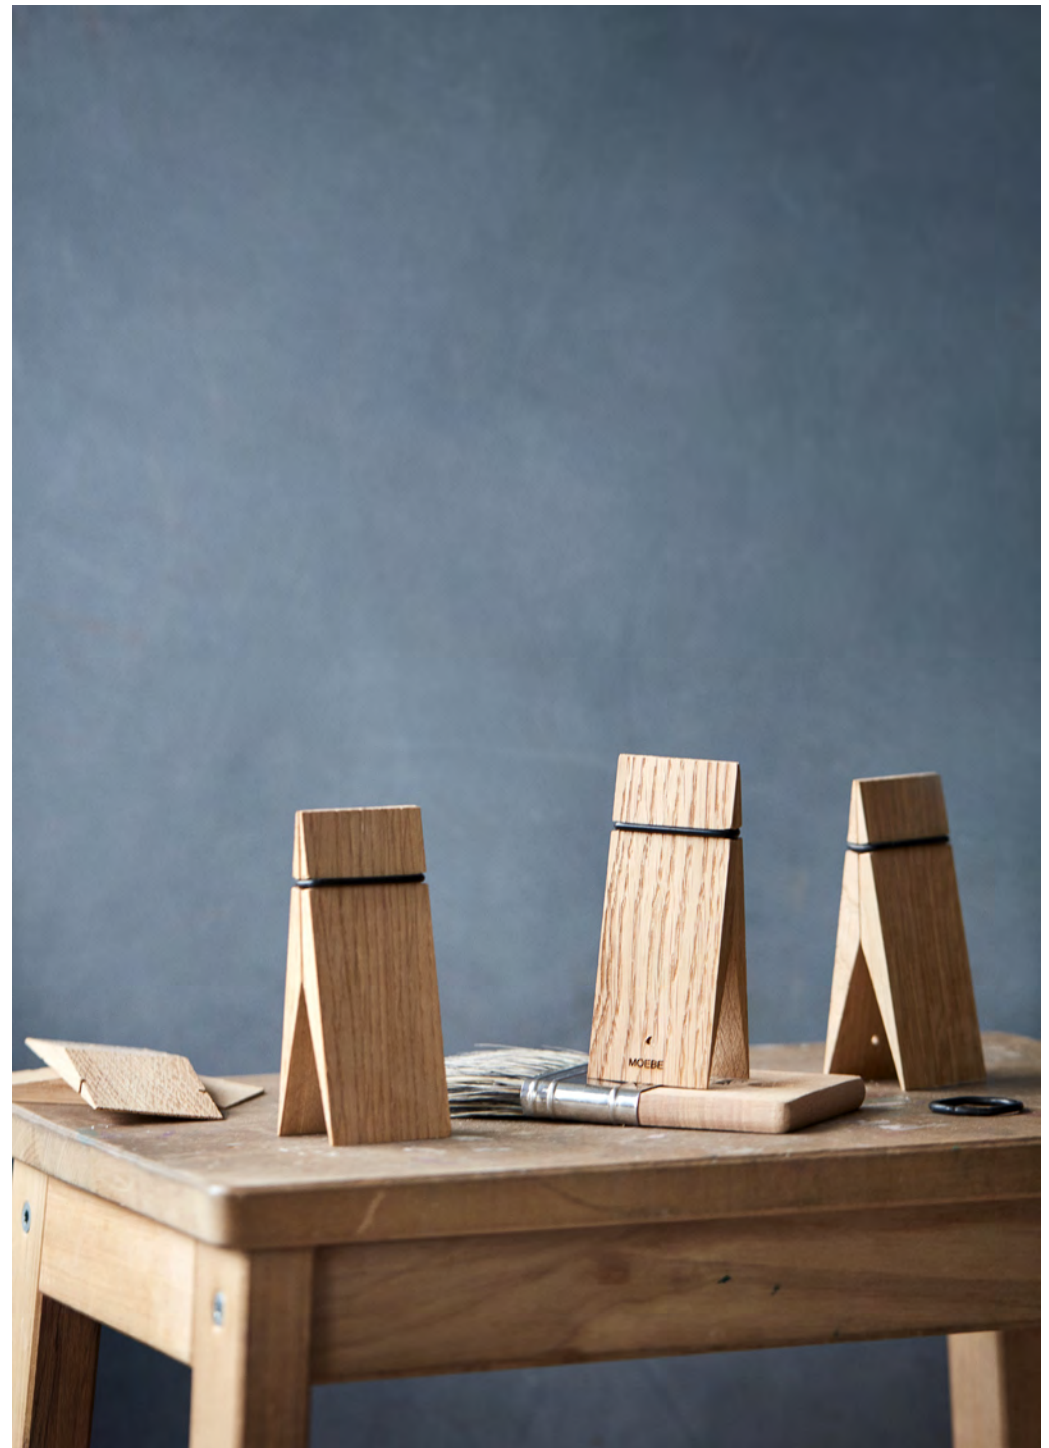

Polygrif is a customisable creation that transforms through the touch of your hands. Mind and hand working together to explore the endless expressions of these little creatures. The pieces are made of solid oak and ash, and it will last a lifetime if you take good care of it. Please do so, much love has been put into making it.

Pinch

Some moments you just want to last a little longer. Pinch helps you hold on to some of those moments. Maybe you saved your ticket from last weekend's concert or a handwritten note from the one you love. These small items are important tokens of our lives, so when you are handed these tokens 'pinch' them.

Pinch, Black

Side Table

Your home is never the same. During those cold winter mornings or sunny afternoons, you adapt your space to fit the season, time of day or just your mood. Side Table is designed to move and adapt along with you.

Side Table, Black

Side Table, White and Black
